CLEVRY-ATS INTEGRATION DIAGRAM

1. High volume/seamless candidate journey process flow

1. Candidate registers with ATS

Candidate completes registration information and any application for/CV upload

1. ATS registers candidate with Clevry

ATS uses RegisterCandidate web service. Clevry sends back autologin URL for candidate

2. Candidate clicks link to testing

Link seamlessly takes them to Clevry to take assessments specific to the role

3. Candidate arrives at Clevry

Link automatically logs them into Clevry to complete assessments.

5. Candidate arrives back at ATS

Finishes any outstanding steps for applications. End of candidate journey.

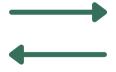

4. Candidate finishes tests

Clevry updates their status to 'complete'. Candidate clinks link that takes them back to ATS

6. ATS calls Clevry for results

ATS can check for updated statuses or call the Get Results web service directly.

7. Clevry sends candidate results and reports to ATS

Clevry sends scores in XML string and reports as PDFs.

2. Low volume/traditional candidate journey process flow

1. Candidate registers with ATS

Candidate completes registration information and any application for/CV upload

1. ATS registers candidate with Clevry

ATS uses RegisterCandidate web service. Clevry sends back autologin URL for candidate

2. Candidate submits CV

ATS emails candidate with invitation to complete psychometrics. Email includes unique link for candidate.

3. Candidate arrives at Clevry

Link automatically logs them into Clevry to complete assessments.

5. Candidate arrives back at ATS

Finishes any outstanding steps for applications. End of candidate journey.

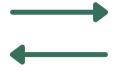

4. Candidate finishes tests

Clevry updates their status to 'complete'. Candidate clinks link that takes them back to ATS

6. ATS calls Clevry for results

ATS can check for updated statuses or call the Get Results web service directly.

7. Clevry sends candidate results and reports to ATS

Clevry sends scores in XML string and reports as PDFs.
